160-90	160		
170-90	170		

(\*) In case of a built-in tray, the height can vary between 200 and 215 cm

## CHECK-LIST before installation

Can I **fit** ELMER in my bath area?

- I have 2 corner walls to install my ELMER
- I don't have a window in the space dedicated to installing my ELMER
- My wastewater disposal is located on the floor in the area where the future tray will be placed
- My inlets are located on one of the 2 walls where ELMER will be placed

*If I choose ELMER in connected version or the speaker option:*

- I need to check for the presence of an electrical outlet on the wall behind the panel

If you have any doubt on any of these points, **call us**, we are here for you!
